Introduction

By now word of the controversial Project 2025 has spread from coast to coast, but many may be wondering what's it all about. The 900-page document covering this project proposes major changes to the U.S. government and to foreign and domestic policies, with significant implications for the future of our nation. Given the length and scope of the document, the Project 2025 Indexing Task Force, a group of professional indexers, has developed an index meant to serve as a finding aid for those seeking access to information on key topics of interest.

The indexing of the [Project 2025 report](#) is strictly a volunteer effort. Members of the task force have not received either funding or endorsements by any political organization and are not affiliated with the Heritage Foundation or with any of Project 2025's contributors.

Page numbers followed by *f* and *t* indicate figures (or charts) and tables. Numbers followed by *n* indicate end notes.
